

## Product Detail

The Telescopic PU Bollard is a strong, low maintenance security solution. A fully retractable option, it simply slides into its host tube below ground when not in use.

Cast around an internal steel core for increased strength, this durable bollard is ideal for urban landscapes. Its polyurethane coating offers a high-strength, non-ferrous exterior, which helps prevent rust and corrosion and reduces ongoing maintenance costs.

With an above ground height of 730mm and a 135mm diameter as standard, it can be customised with three different banding options in red, amber or white. Matching static bollards are also available.

- Durable telescopic bollard
- Manufactured from a Polyurethane coating
- Low maintenance
- Available with optional hazard banding
- Matching static bollards available
